ForgingBlock Offer

Payment Integration

We help the project to **PIVX** for daily usage.

PIVX will be available for use of our APIs, E-commerce plugins, and Widget, Merchants Dashboard and Wallets to allow the business to accept payments in your coin / token

API: https://api.forgingblock.io, is a robust payment gateway with a fast response with comprehensive development documentations Features are current supported:

- MainNet and TestNet development support
- Invoice History Management
- Chain Stores Management
- Crowdfunding & Subscription support

Our API will let your ecosystem expand, developers from your community can benefits from this API, as they can integrate into their own blockchain applications, as long as they are involved payment translations. like betting, donation, etc...

E-Commerce Plugins: https://forgingblock.io/plugin

PIVX will be integrated into multiple E-Commerce plugins - Merchants can use them directly with no further development needed.

- E-Commerce plugins
  - WooCommece
  - PrestaShop
  - OpenCart
  - Zen Cart
  - Magento2
  - Shopify (Coming)
